Precast Rock Armor Data Sheet

Edenstone Masonry NQ are located in Townsville, Edenstone manufacture wet cast concrete pavers and manufacturer industrial products specifically designed for walking trails including pre cast steps and rock armor.

Rock Armor is manufactured from concrete and features a natural rock pattern, it is designed to be laid onto the ground in high traffic areas and will conform to the natural ground contours, the application of geo mesh during manufacture enables the product to hold together indefinitely after installation.

Specifications:

900mm long X 600mm wide X 50mm High.

3 different patterns are produced to provide a more natural appearance.

Weight: 50kg approx. per sheet.

Each sheet is approximately 50mm thick.

Product Quality: the product is guaranteed to be 40MPA at 28 days, cylinder crack test data can be provided, this must be requested prior to manufacture.

Colour: Edenstone can produce the precast step units in almost any naturally occurring colour.
